Vegetated Sedum Tiles

Description

CCW's Vegetated Sedum Tiles are the fastest and easiest way to achieve full vegetative coverage on a Green Roof on the day of installation. These lush and vibrant tiles are the perfect way to quickly finish your Green Roof project.

Features and Benefits

- Instantaneous vegetative coverage
- No waiting for plants to grow
- Up to 12 different varieties of sedum can be used
- Minimal maintenance
- Further simplifies Green Roof installation

All Season Mix

This mix provides flowers throughout the whole growing season. Winter interest and seasonal foliage color changes are also found in this group. This is a good, general purpose mix that provides year-round beauty. Each tile includes 6-8 of the listed varieties.

Color Max Mix

Color Max includes a blend of sedums for use when maximum color is desired. The tiles produce abundant, brightly colored foliage in complimentary colors. Each tile includes 6-8 of the listed varieties.

Installation

Remove the tiles from the cardboard shipping inserts. Place the tiles over a minimum 2½" of CCW's pre-moistened Growth Media. Water the Green Roof assembly to the point of runoff. Your Green Roof is now fully vegetated!

Size and Coverage Rate

- 2.08 ft² per tile
- 15" wide x 20" long
- 4.5 lbs/ft² fully saturated
- Minimum 95% vegetative coverage

Vegetated Sedum Tiles

Shade Mix

The plants in Shade Mix are those that have demonstrated abilities to withstand the difficult conditions of shade. All sedums do best in higher light, but this group tolerates low light better than most. Each tile includes 6-8 of the listed varieties.

Tuff Stuff Mix

The sedums in Tuff Stuff are the toughest, most durable, most drought-resistant choices available. They have proven ability to survive wind, cold, heat, drought, and tough environments that limit plant choices. Each tile includes 6-8 of the listed varieties.
