## Barritech VP now a 4-season product

*Just is time for winter!*

Sept. 24, 2018, Wylie, Texas -- Carlisle Coatings & Waterproofing Incorporated "CCW" is pleased to announce that Barritech VP liquid-applied air and water resistive barrier is now approved for installation down to 20°F. CCW recommends this based on application testing and extensive field experience.

Barritech VP has been on the market for more than 10 years and has been installed on millions of square feet of exterior wall. Since Barritech VP is now a 4-season product, CCW is discontinuing Barritech VP-LT.

Packaged in 5-GAL pails and 50-gallon drums, Barritech VP can be applied by airless spray, roller or brush. It is available year-round wherever CCW's wall membrane products are sold.

Find the latest information about [Barritech VP here](#). Please contact your local CCW Sales Representative to learn more about low-temp application of Barritech VP.
